## ✈ Skills

Java

Angular

Wordpress

Html, Css

## 🗣 Language

English

## 🎯 Objective

I am an experienced software developer seeking employment with a fast-growing company. I bring more than 2 and a half years experience writing Java , Javascript and more than 3 year experience in the technology industry.

## 👜 Experience

- **Upwork Inc.** 01/12/2019  
Freelancer - Present  
I have been working past year as a freelancer on **Upwork**. I have mostly built *Android Apps*, aswell as websites using different frameworks like **Angular, Wordpress, Express Js, HTML5 and vanilla Javascript**.
- **Fiverr** 2018 -  
Freelancer Present  
Since the beginning of 2018 and until today I work in Fiverr as a part time freelancer. My gigs offer **Android App builds, Ionic 5 apps, and Wordpress sites**.

## 🎓 Education

- **Universi High School** 2018  
9.96
- **Polytechnic University of Tirana** Third Year  
Software Engineering Student

## 🔥 Projects

- **Termium - Termux tool Guide**  
Termium is a collection of open source tools to be used in termux.  
  
It's an application that has plenty of open-source tools guides. It's easy to copy and use them on your terminal. You can use these tools if you are a penetration tester or even an ethical hacking enthusiast.  
App Link: <https://play.google.com/store/apps/details?id=com.termium>

## URL Shortener

Shorten long URLs easily using [is.gd](#), [shorte.st](#), TinyURL services to easily share them via social media like twitter or facebook using our URL Shortener. Shortening your URLs will also make the links look elegant and clean. Sometimes it's the shorter things that we prefer.
